

## Summary

The investment theme of the important things at the present time, particularly the subject of foreign investment since he became foreign investment, a measure of the evolution and stability of many countries and the source of her strength and this is what made us see today the countries do not have a large military force, but have a strong economy through investment in general and foreign investment in especially we see play an important and effective role in the world, so these countries proceeded to issue legislation and provide guarantees and temptations intended to make the overall investment climate attractive.

As in Iraq, did not invest the proper sense enabled Despite the enactment of Law No. (62) for the year 2002 and named after the Arab investment I have for the law remained a dead letter to be canceled after 2003 as well in spite of the formation of the Baghdad Stock Exchange early nineties for I was there were not companies foreign-exist and even market investment level was not effective because it seemed the economic embargo on Iraq at the time and in the present time any after 2003 acquired the subject of attracting and encouraging investors to enter the Iraqi market, promising big importance of parallel and inseparability of building the new Iraqi state he has become one of the basic building substrates as the presence of investment environment that encourages investment and the transfer of modern technologies to contribute to the development of Iraq and to develop and expand its base production and service and diversification process as defined by the investment Law No. 13 of 2006, amended.

But the investment movement in Iraq and the interface is facing a lot of difficulties and obstacles are many, beginning with the fact that the experiment young or because of the security and political situation unstable somewhat or lack of expertise or the

presence of red tape and bureaucracy and other things that serve as negative toward the movement and the entry of investment in Iraq.

It is here to be the activation mechanisms and proposals contribute to attract foreign investment and the most prominent of these things is the activation of the benefits and guarantees for foreign investment to make it attractive, and we know the famous quote (capital coward) In order to be a foreign investor Mtmon must provide all the benefits and guarantees him and strengthen these safeguards and especially the legal fact that Iraq, as a developing country is in dire need of foreign investment, especially that the conditions experienced by him in urgent need of foreign investment, so the best Iraqi legislator do well when issued investment Law No. (13) for the year 2006 as Alhalah- in spite of the presence of gaps and the sockets - which encouraged foreign investor to risk his money and entered the head in Iraq by providing many of the guarantees that we will look to him and looked at her.
